MB markers in Australian languages

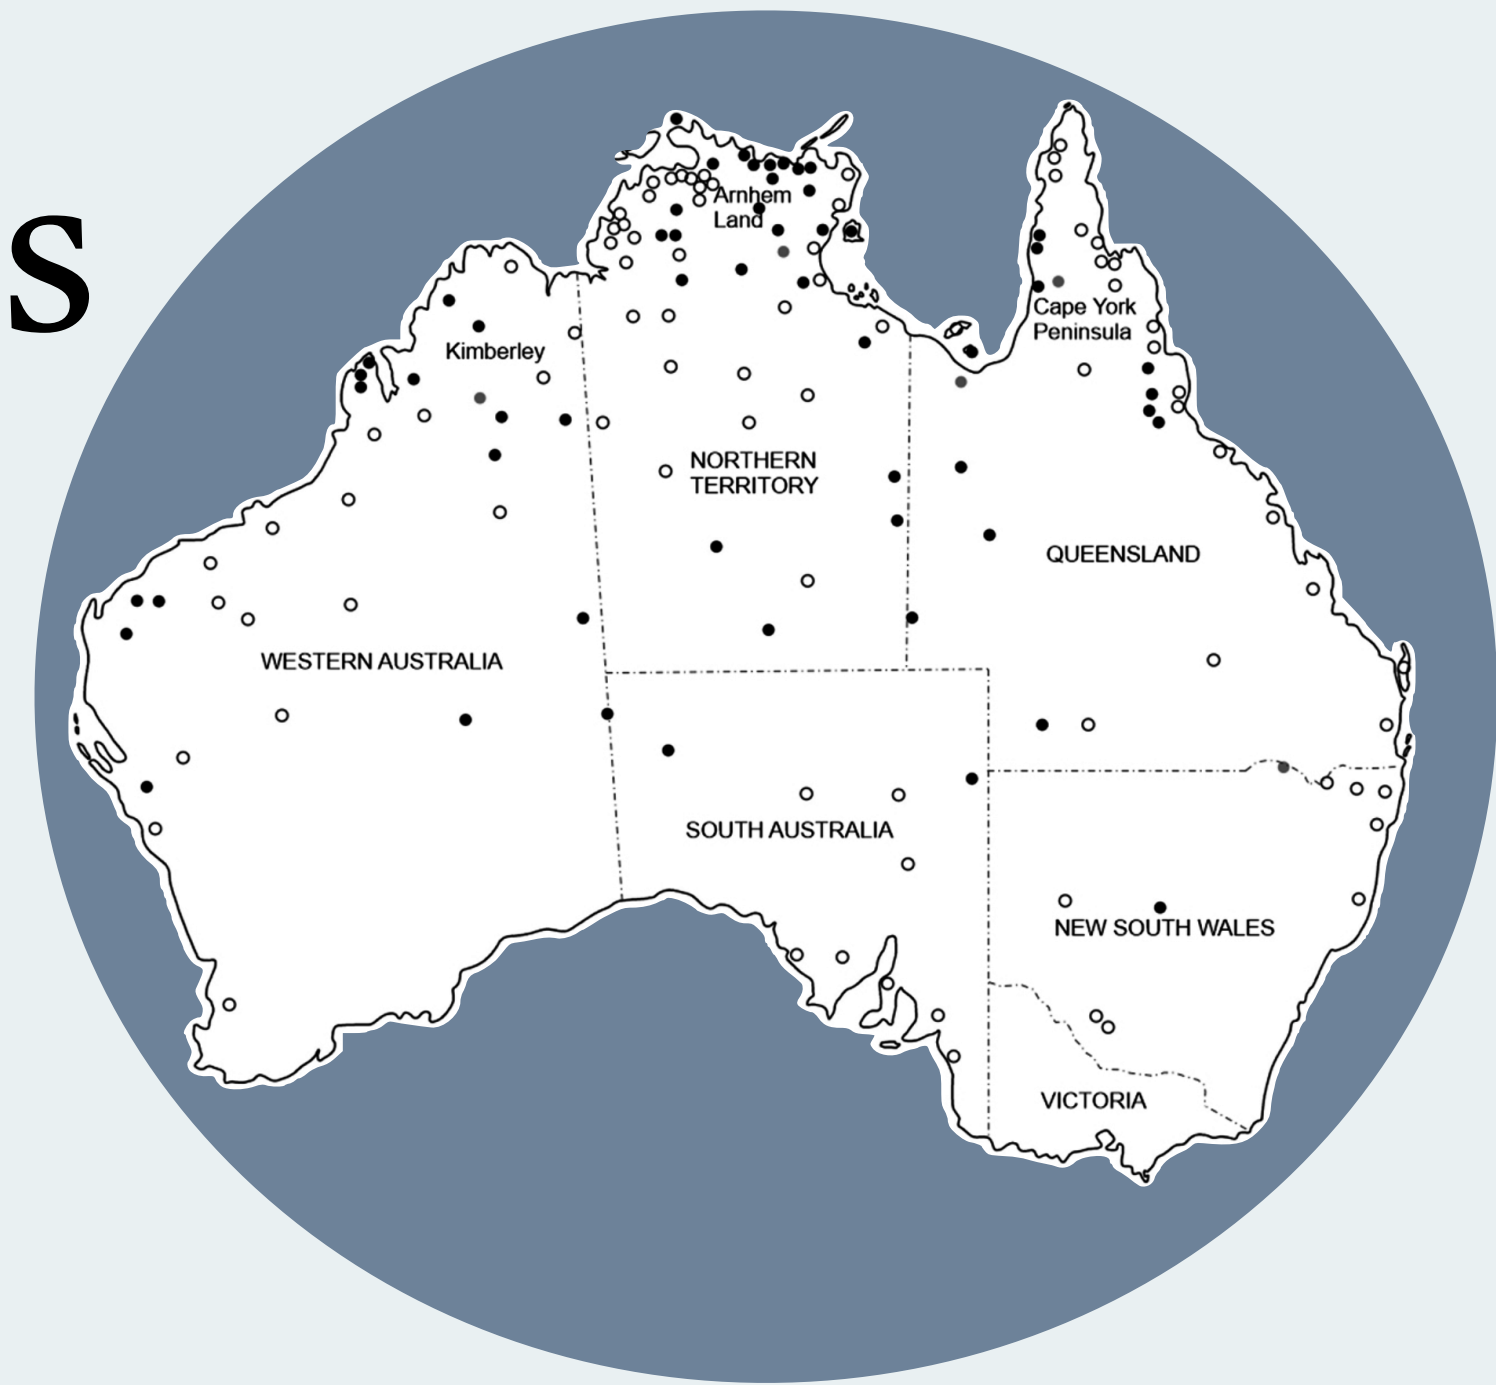

Large-scale typological survey of Mistaken Belief (MB) in Australian languages (McGREGOR 2024) found:

- i) Widespread uses of dedicated strategies across unrelated languages
- ii) Strategies beyond sentential complementation

Significance: Performance on false-belief tasks has been correlated with acquisition of linguistic structures (VILLIERS ET VILLIERS 2000, MATSUI ET AL. 2009)

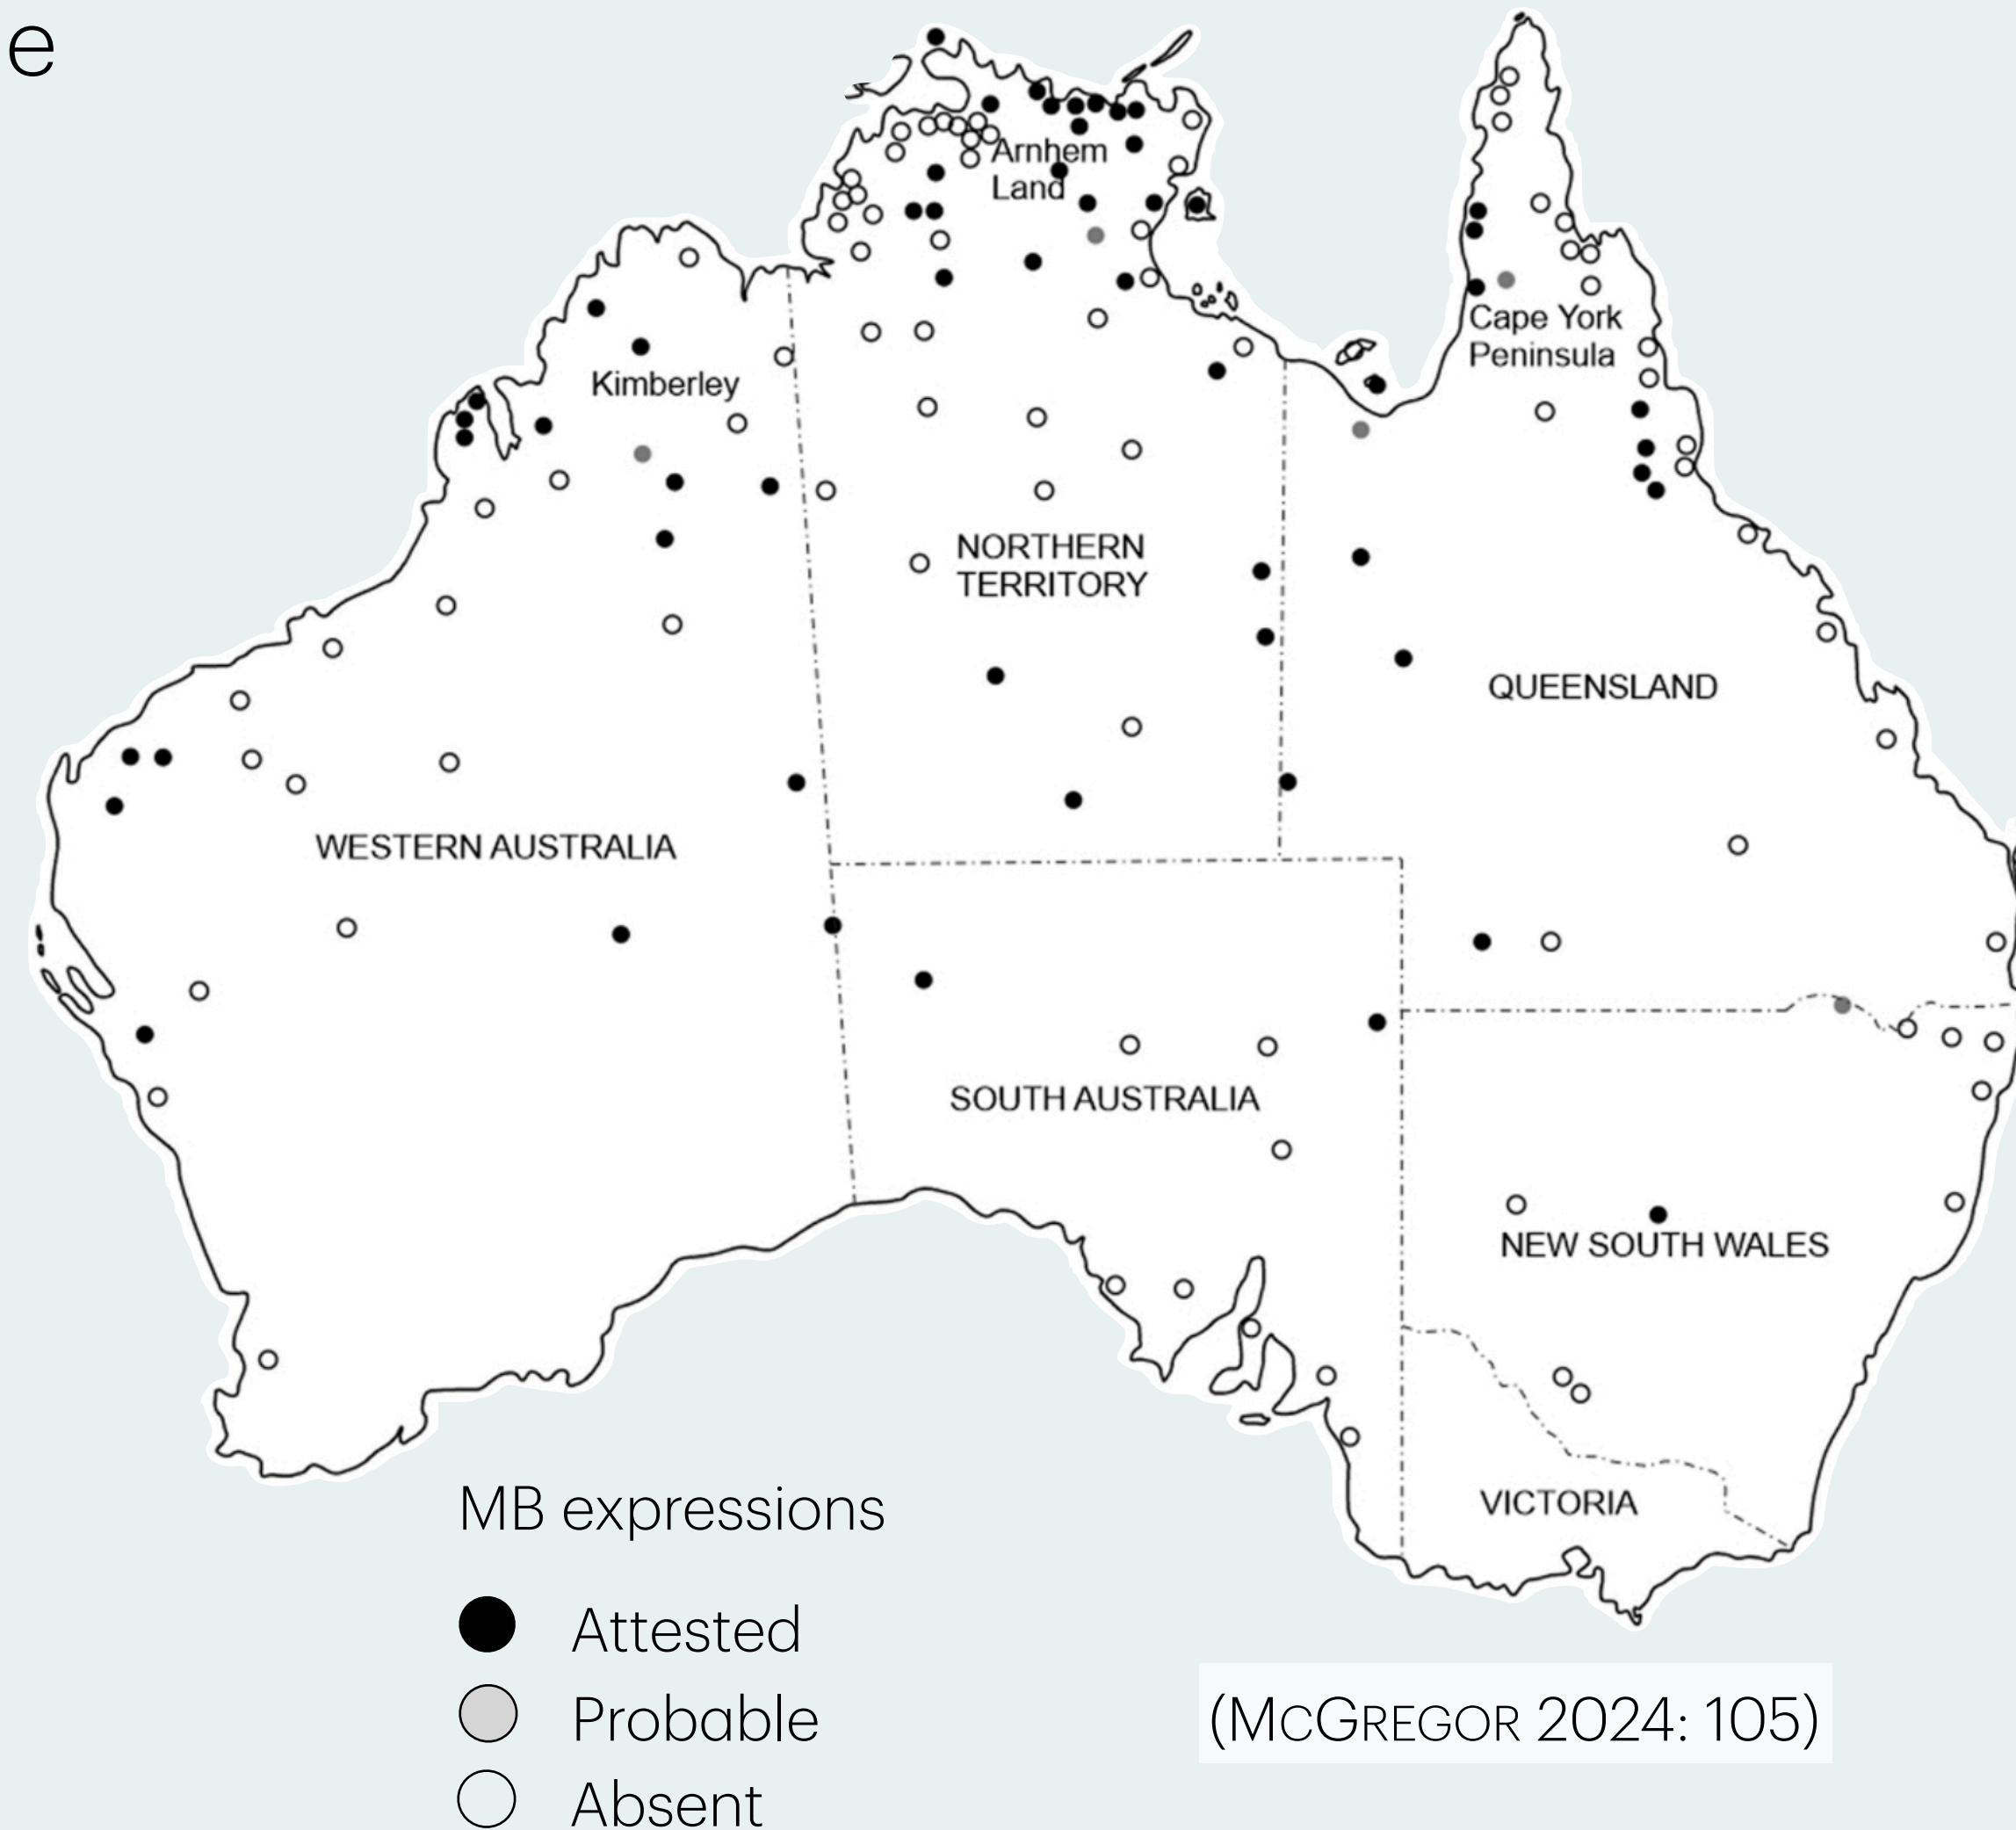

In this talk: **diachrony** of these elements (under-investigated)

- > Data from one Pama-Nyungan subgroup point to an unidentified diachronic trajectory for MB markers

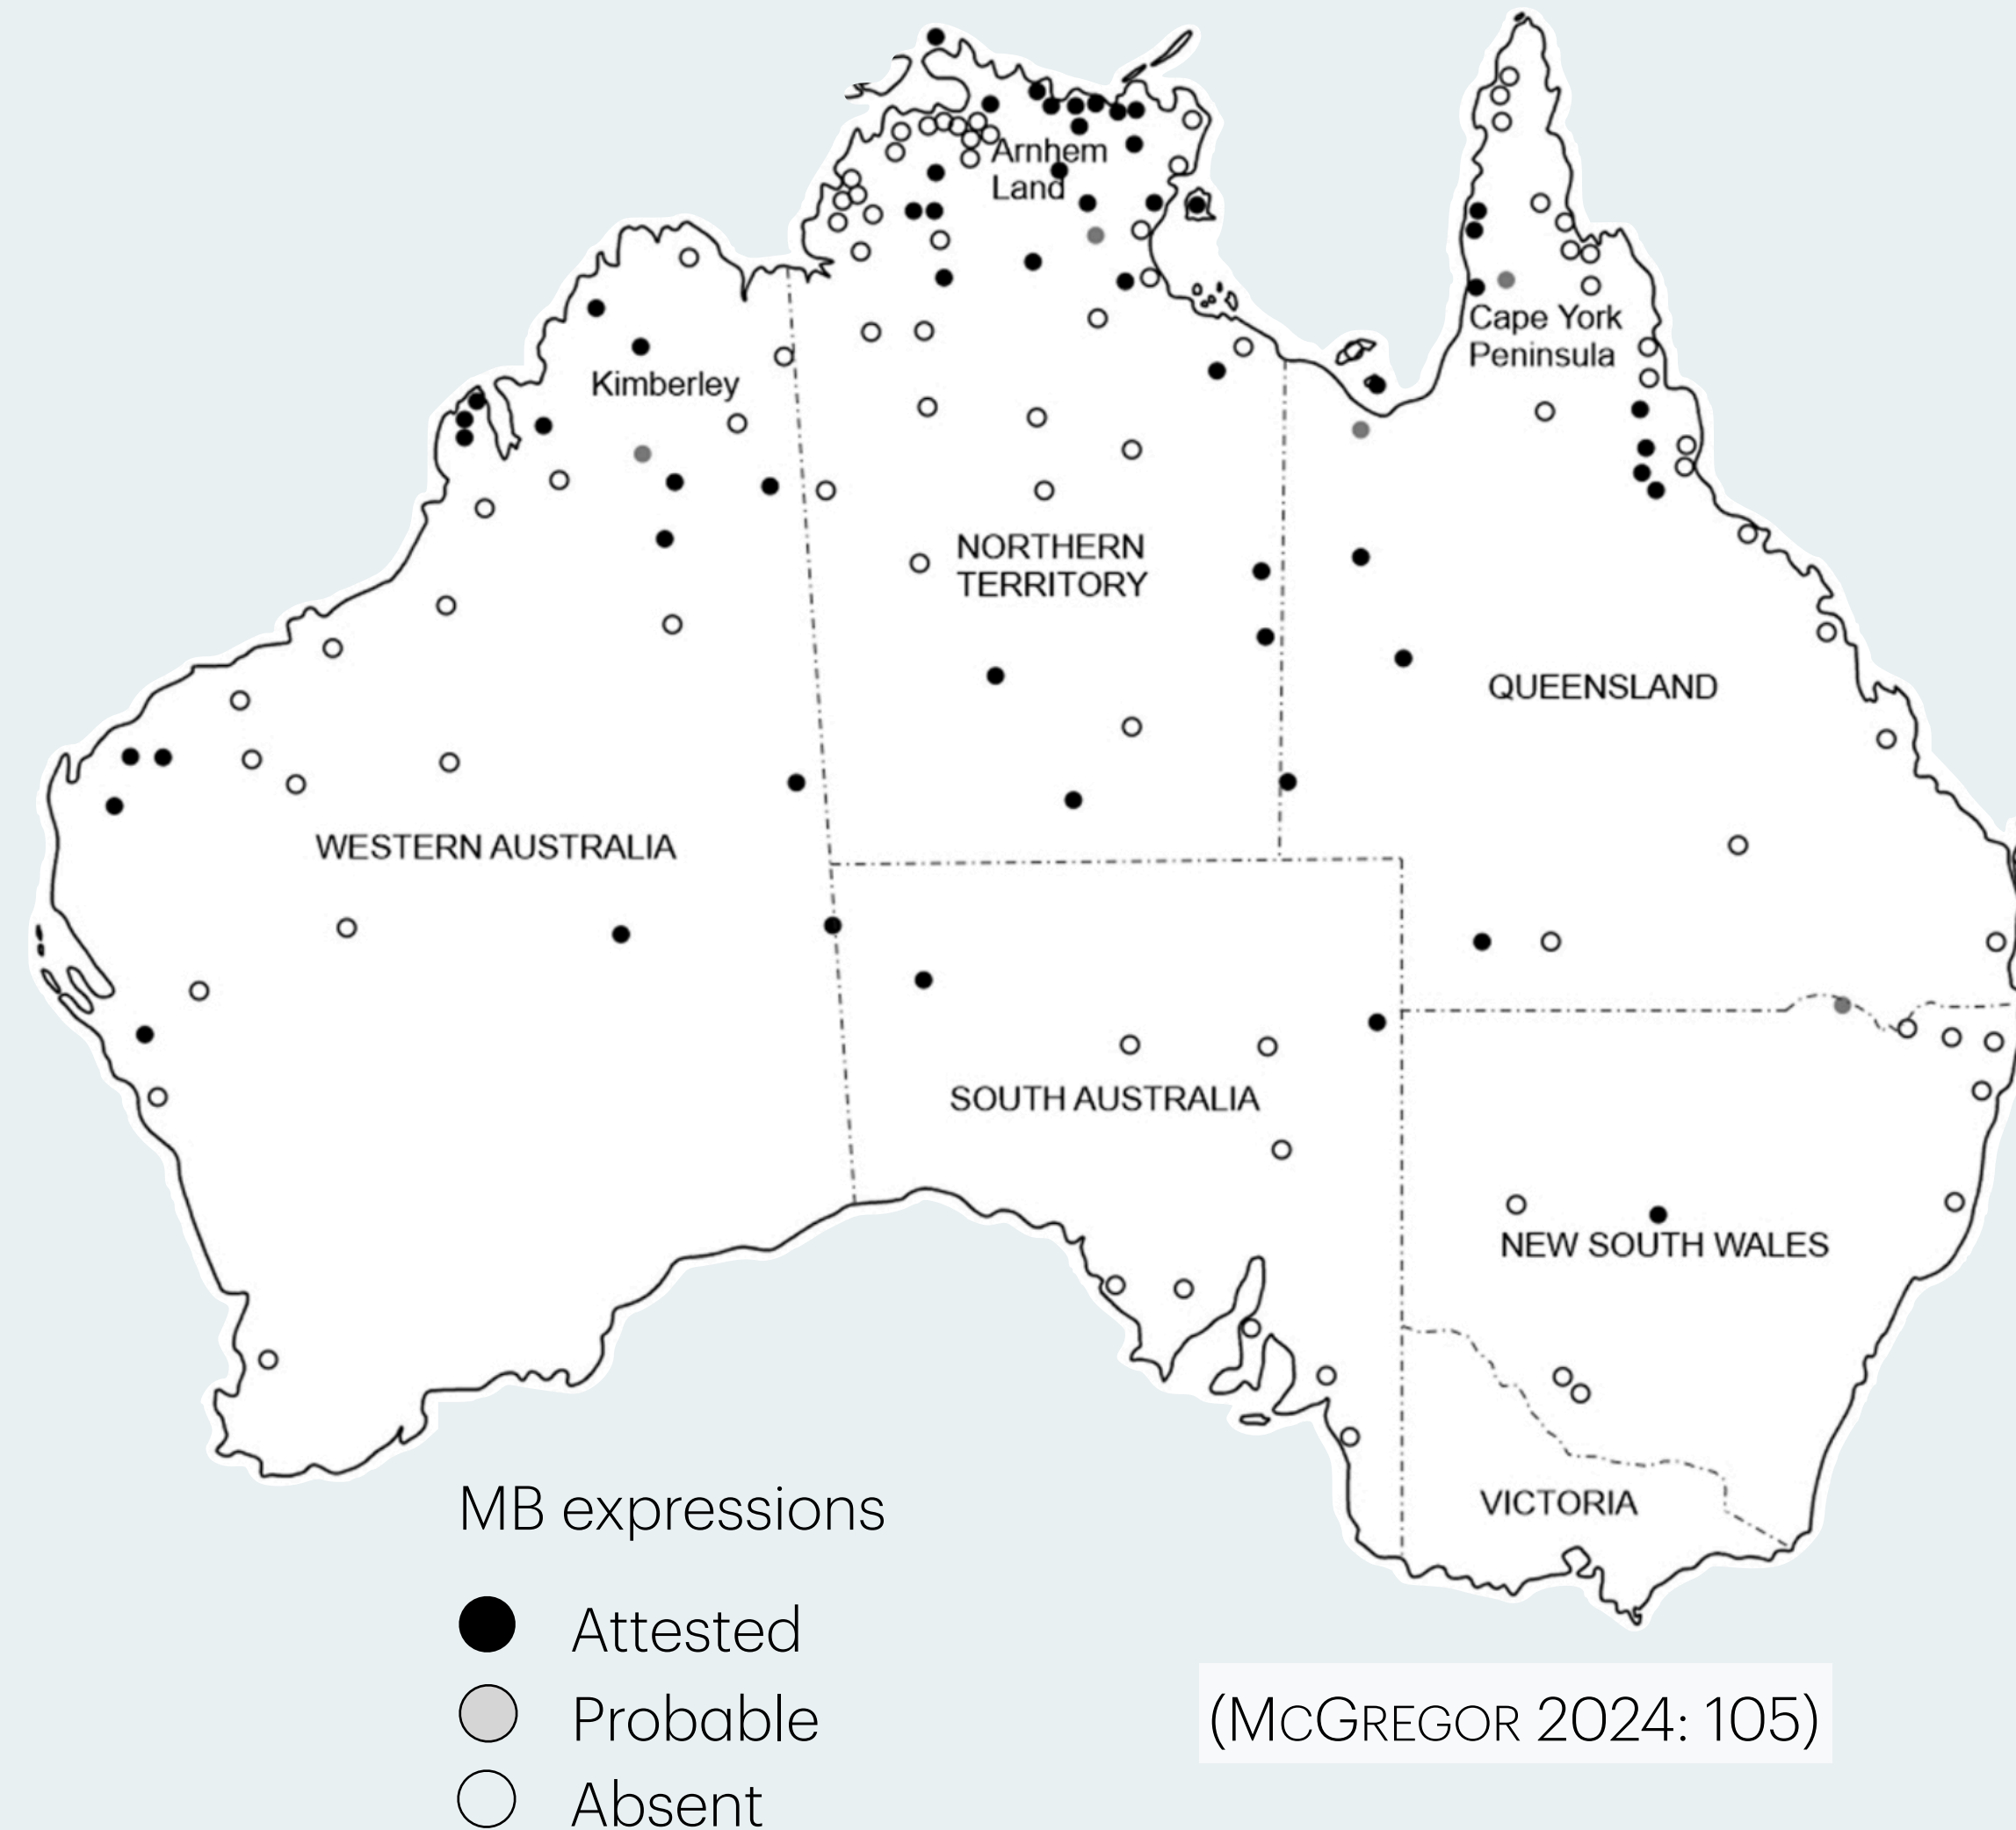

Expression of MB within Australia

- 40% of sampled Australian languages exhibit some means for expressing MB (MCGREGOR 2024)
- Across unrelated languages
- In formally varied ways

Expression of MB within Australia

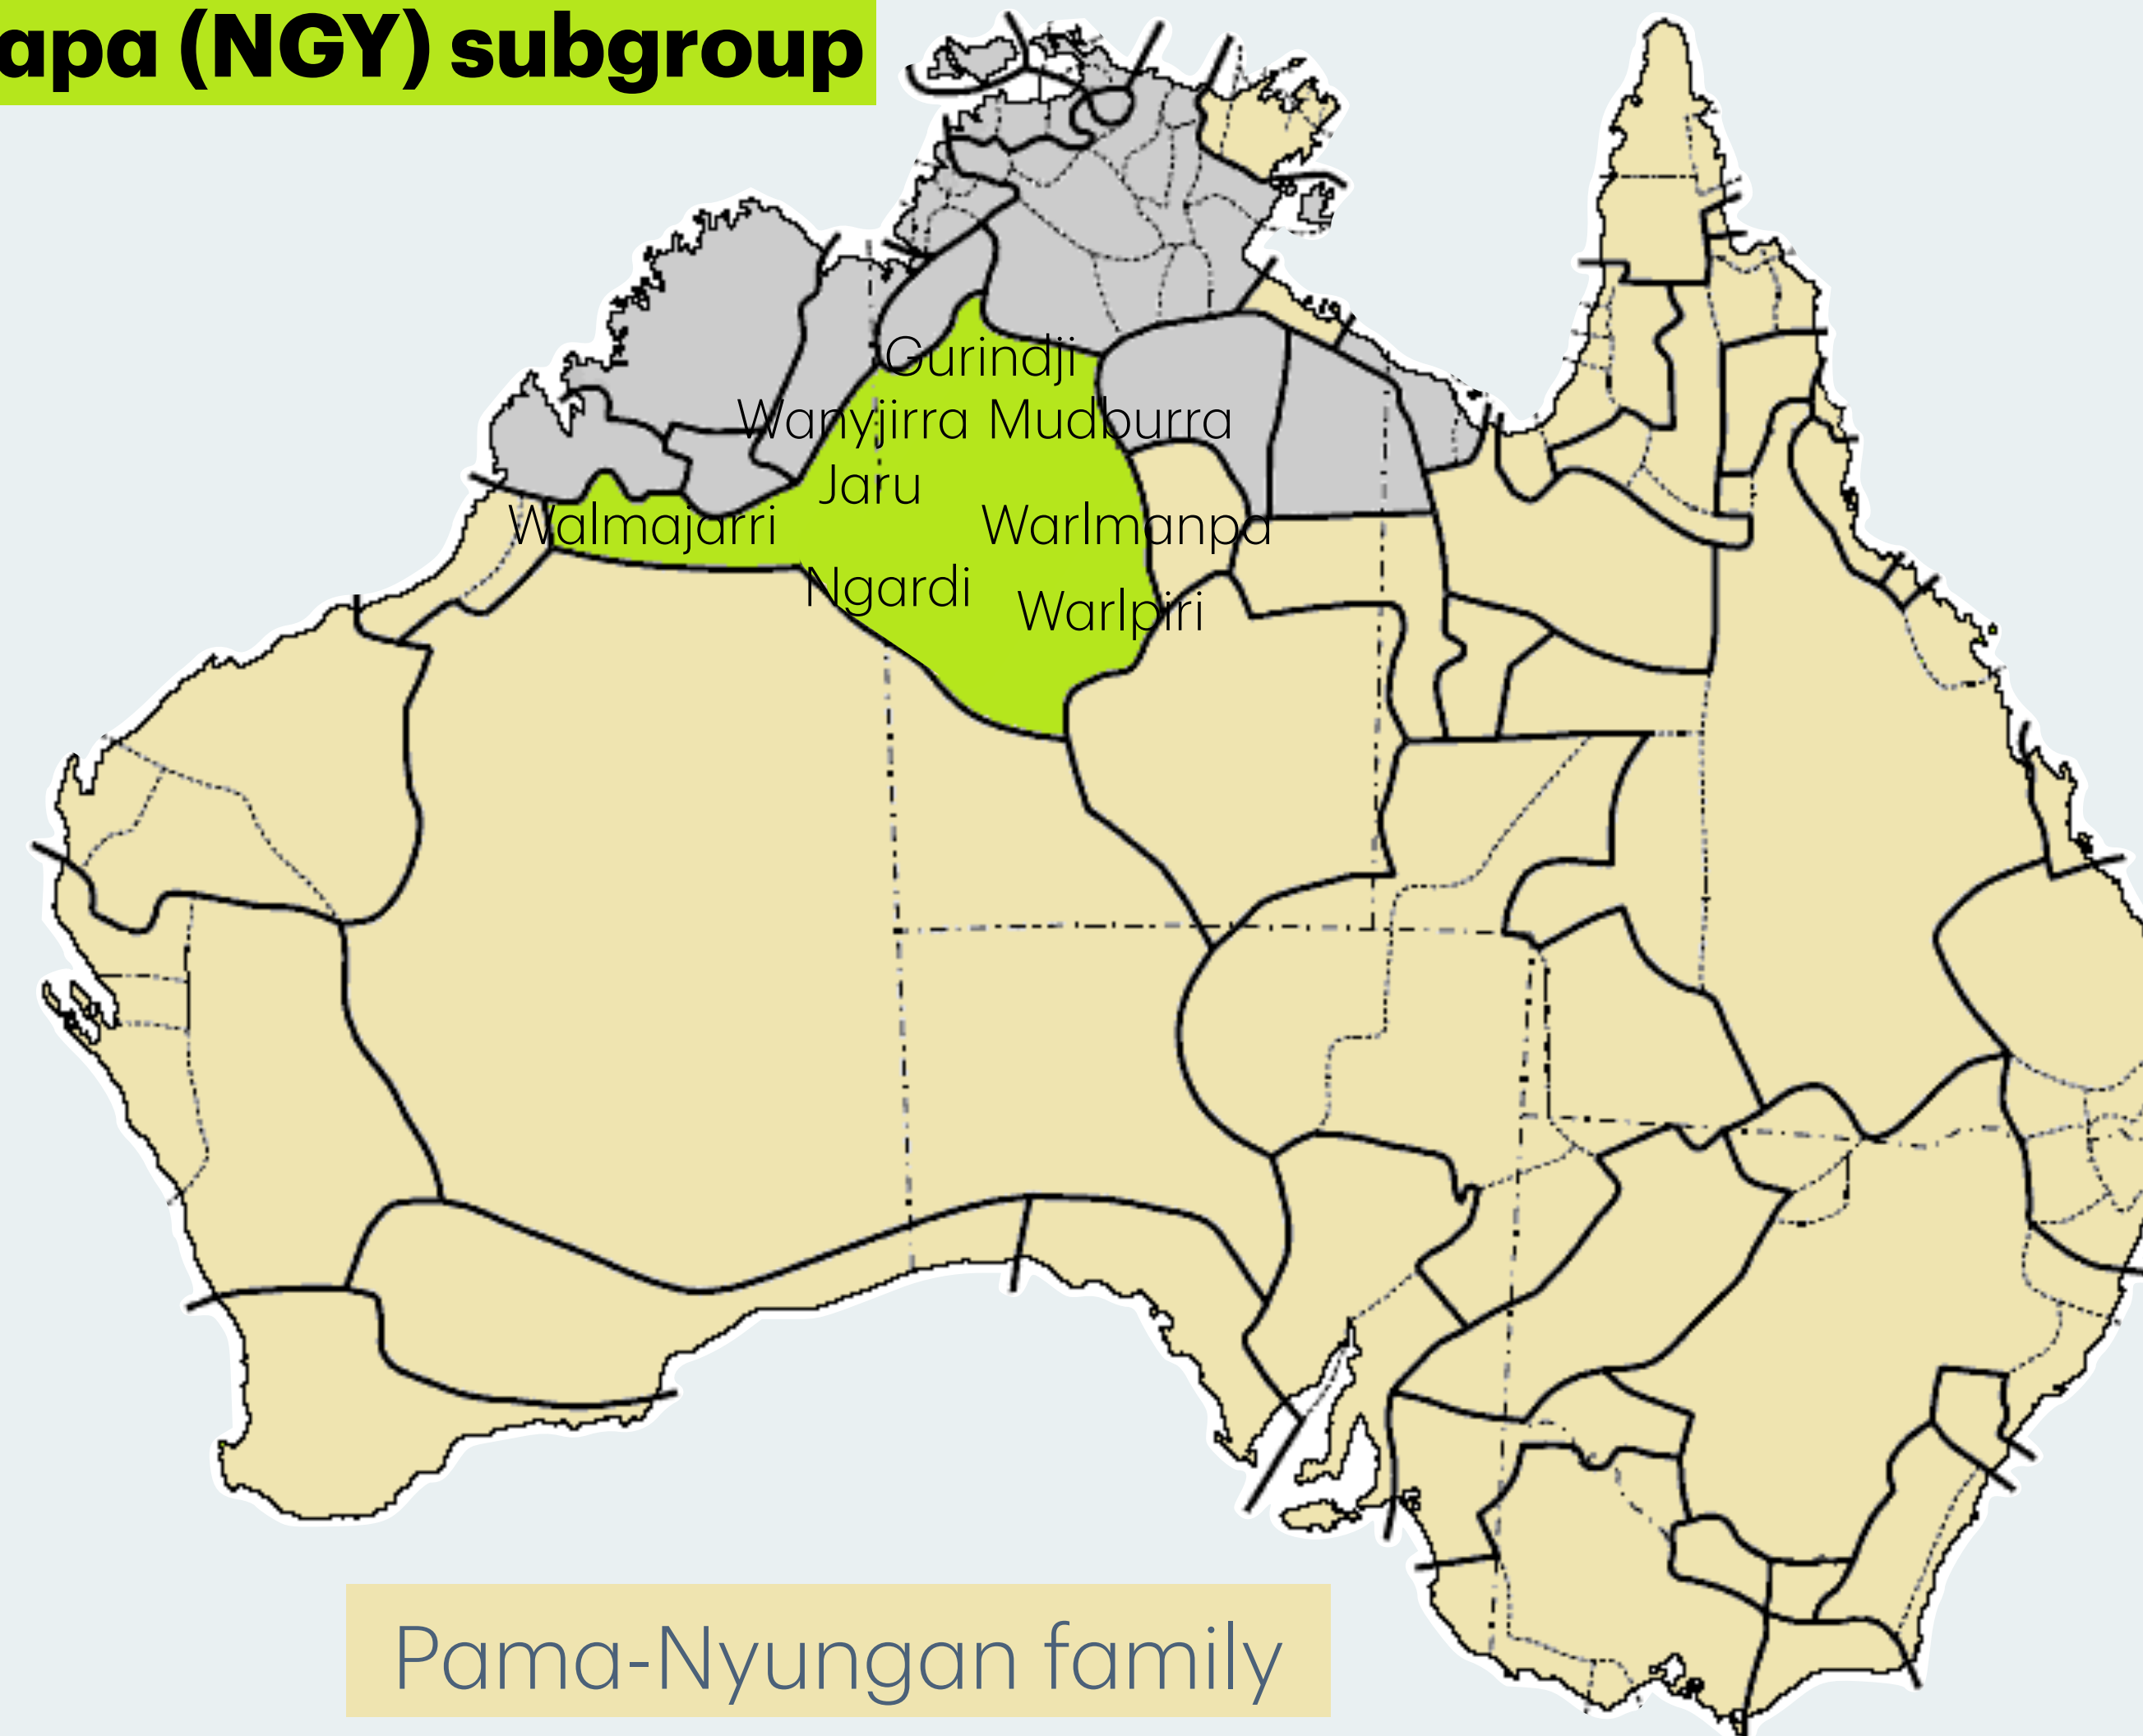

- Where do these markers come from?
- How do they change over time?

Diachrony of MB expressions in NGY

Ngumpin-Yapa (NGY) subgroup

- In this talk:
 - MB within a single PN subgroup
 - Details of these markers
 - Reconstruction of these markers and a diachronic relationship with **modal negation**
 - Possible pathways for **functional reanalysis** of MB markers

Data

- Resources: published grammars and dictionaries

The expression of MB in Ngumpin-Yapa

- Two types of dedicated MB constructions in Australian languages:
 - I: Dedicated morpheme (bound or free)
 - II: A complement construction, typically with a special marker

The expression of MB in Ngumpin-Yapa

- Two types of dedicated MB constructions in Australian languages:
 - **I: Dedicated morpheme (bound or free)**
 - II: A complement construction, typically with a special marker

Wanyjirra (SENGE 2015: 493)

(1) ***Gulangarra*** *ngu=yi* *ba-rra*

MB REAL=1MIN.O bite-IMP

‘I thought he would bite me (but he didn’t).’

Properties of MB markers in Ngumpin-Yapa

- Characterised by considerable flexibility {**syntactic**, semantic}:
 - Preposed or post-posed to clause-expressing proposition (Warlpiri: LAUGHREN 1982)

Ngardi (Ennever 2021: 605)

(2) “*Mutika yapartu-nganta!*” **Kulangarra** *mutika, kala maeilplein ya-nani-nyirra.*
vehicle run-PRS **MB** vehicle ASRT mail_plain go-IPFV-NARR
“‘A vehicle is coming!’ (We) had thought it was a vehicle but it was (the) mail plane.’

Properties of MB markers in Ngumpin-Yapa

- Characterised by considerable flexibility {**syntactic**, semantic}:
- Variable separation from phrasal rels over which they have scope (N.B. P2 clitic complex)

Jaru (TSUNODA 1981: 206)

(3) **Garaj** **gulanga**=*rna* *lan-i* *ngandu ganyji.*

body **MB**=1SG.S stab-PST in_fact leg

‘I thought I was stabbing the body, but in fact I was stabbing the leg.’

Ngardi (ENNEVER ET AL. 2024: 221)

(4) **Kulanganta**=*rna=ngku* **jina** *pat-kanyi-rni* *kala purnu.*

MB=1SG.S=2SG.O **foot** squash-crush-PST ASRT tree

‘I thought it was your foot I squashed, but it was the stick.’

Properties of MB markers in Ngumpin-Yapa

- Characterised by considerable flexibility {syntactic, **semantic**}:
- Scopal flexibility: (mis-)categorization of an entity

Jaru (TSUNODA 1981: 206)

(3) **Garaj** **gulanga**=*rna* *lan-i* *ngandu ganyji*.
body **MB**=1SG.S stab-PST in_fact leg

‘I thought I was stabbing the body, but in fact I was stabbing the leg.’

Ngardi (ENNEVER ET AL. 2024: 221)

(4) **Kulanganta**=*rna=ngku* **jina** *pat-kanyi-rni* *kala purnu*.
MB=1SG.S=2SG.O **foot** squash-crush-PST ASRT tree

‘I thought it was your foot I squashed, but it was the stick.’

Properties of MB markers in Ngumpin-Yapa

- Characterised by considerable flexibility {**syntactic, semantic**}:
 - Scopal flexibility: (implicit) proposition encoded by **direct speech**

Ngardi (ENNEVER ET AL. 2024: 221)

(5) <i>Kartiya=lu</i>	<i>nya-nganta</i>	<i>kulanganta,</i>	<i>kulanganta</i>	“Oh
white=3PL.S	see-PRS	MB	MB	oh
<i>nice painting!</i>	<i>Wakurra=lu</i>	<i>purda-nya-nganta</i>	<i>that’s</i>	<i>walya.</i>
nice_painting	NEG=3PL.S	listen-see-PRS	that’s	country

‘Whitefellas look at it, mistakenly thinking “Oh, nice painting!”
They don’t understand that that is country (not ‘just’ a painting).”

Warlayirti Artists (with permission)

Properties of MB markers in Ngumpin-Yapa

- Tendency to be paired with an additional clause expressing realis event:

Walmajarri (RICHARDS & HUDSON 2012)

(6) ***Kula***=*n* *kukulyujuwal* ***minyakujala*** ***talyparrma-rnu-juwal***
MB=2SG.S quiet **but** **speak_angrily-NF-HABIT**
'I thought you were a quiet person, **but you tell people off.**'

Ngardi (ENNEVER ET AL. 2024: 221)

(7) ***Kulanganta***=*rna=ngku* *jina* *pat-kanyi-rni* ***kala purnu.***
MB=1SG.S=2SG.O foot squash-crush-PST **ASRT tree**
'I thought it was your foot I squashed, **but it was the stick.**'

Kula as MB and NEG

- *kula* an MB marker in Western Walmajarri:

(W) Walmajarri (RICHARD & HUDSON 2012)

(8) ***Kula*** *wanjingarna* *paparr-marn-i*.

MB alive without_thought-speak-PST

'I thought he was [still] alive (but he wasn't), I said (that) without thinking.'

- Compare *kula* as marker of SN in Eastern Ngumpin languages:

Malngin (Ise 1999: 69)

(9) ***Kula***=*rna* *karri-nya* *marru-ngka* *minyan*.

NEG=1SG.S be-PST house-LOC nothing

I didn't live in a house.'

Kula as MB and NEG

- *kula* an MB marker in Western Walmajarri:

(W) Walmajarri (RICHARD & HUDSON 2012)

(8) ***Kula*** *wanjingarna* *paparr-marn-i*.

MB alive without_thought-speak-PST

‘I thought he was [still] alive (but he wasn’t), I said (that) without thinking.’

- Compare *kula* as a marker of modal negation (incapacity) in Jaru:

Jaru (TSUNODA 1981: 204)

(10) ***Gula=n*** *bard-gang-gu*.

CANNOT=2SG.S fly-carry-PURP/POT

‘You cannot fly.’

**kula* as NGY innovation

- No other **Western Pama-Nyungan** languages share such a form:meaning pairing
 - No reflexes in Marrngu (to the west) nor Western Desert (to the south)
- ...but what meaning to reconstruct?

**kula* beyond Ngumpin-Yapa

- MB *Kuluma*?

Warumungu (SIMPSON 2002: 124)

(11) **Kuluma** **arnangkku** Ngampula nyanyi.

MB **1-YOU1** Ngampula see-PST

‘I thought you were Ngampula (but in fact you’re not).’

**kula* beyond Ngumpin-Yapa

- Wakaya *kile/kel/kal* (dialect variants):

Wakaya (BREEN & SIMPSON 1985: 131)

(12) **Kilemanth**-arn *wutha-rliy*

MB-1SG.S eat-IRR

‘I thought I was going to eat (it)
(but I didn’t because the dog stole it)’

Wakaya (BREEN 2000: CH8. #20)

(13) **Kal***-arn-bulu *yuk ewe-rniy*

NEG-1SG.S eat-IRR

benke-rn-ande-bulu

go-PST-HITH-that.M

‘I didn’t call that fellow’

yuwu-werl

3SG.M-COM

** Loss of ancestral final vowels in Wakaya is well attested*

The diachrony of **kula*

- Majority of MB markers in Ngumpin-Yapa involve a compound ***kula*** + {***nganta***, ***ngarra***, =***nga***}

		Negation markers			
		Standard NEG	Modal NEG	NEG PRED/EXIST	MB
Western Ngumpin	Walmaj (W)	<i>ngajirta</i>	<i>ngajirta, kayan</i>		<i>kula</i>
	Walmaj (E)	<i>ngajirta</i>	<i>ngajirta, kayan</i>		<i>kulangarra, kularni</i>
	Ngardi	<i>wakurra</i>	<i>wakurra</i>	<i>waku</i>	<i>kulanganta, kulangarra,</i>
	Jaru	<i>wagurra</i>	<i>kula</i>	<i>minyan</i>	<i>gulanga, gulanga+...-rra</i>
	Wanyjirra	<i>wagurra/gula</i>	<i>wagurra</i>	<i>minyarn</i>	<i>gulangarra</i>
Eastern Ngumpin	Bilinarra	<i>kula</i>			—
	Malngin	<i>kula</i>	?	?	?
	Gurindji	<i>kula</i>	<i>kula</i>		<i>kata + ...-nga</i>
	Mudburra	<i>kula</i>	<i>kula</i>	<i>wakurni</i>	—
Yapa	Warlmanpa	<i>kula</i>	<i>kula</i>	<i>walku</i>	<i>kulanganta</i>
	Warlpiri	<i>kula</i>			<i>kulanganta</i>

The diachrony of **kula*

- For most NGY languages MB markers are a fused form *kula* + {*nganta*, *ngarra*, *=rra*}
- ***nganta*** is attested with an evidential/perspectival meaning *supposedly* x,
 - “fails to assert a proposition as true from personal knowledge” (Warlpiri, LAUGHREN 1982)
- ***ngarra*** (and ***nga***) in Ngumpin lgs is attested with epistemic meaning *supposedly* x:
 - Further engendering an apprehensive reading “*might* x”/lest x (Ngumpin), or
- Synchronically, MB compound forms are non-decomposable (Senge 2015: 492; Laughren 1982; Browne 2024: 333)

Composite (but non-fused) MB

- ‘Composite’ MB markers are not uncommon in Australia (McGREGOR 2024):
 - MB **in Gurindji** ‘commonly occurs with dubitative =*nga*’ (MEAKINS & McCONNELL 2021: 550)
 - MB **in Jaru**: ‘with =*rra*’. OR =*rra* ‘to a word in the clause with *gulang* [MB]’ (Tsunoda 1981: 209)

Gurindji MEAKINS & McCONNELL 2021: 149

(14) **Kata=yin=nga** *ma-rni* *ngajik-ku* *ya-nu-wu*
MB=2SG.S>1SG.NS=DUB say-PST long_time-DAT go-INF-DAT
kayi=n *ya-na-na* *wart-pa-rnirni* *wajija=rni*
surp=2SG.S go-IPFV-PRS return-ep=ONLY quickly=ONLY
‘I thought you told me you would be here for a long time,
but here you are coming back quickly.’

A plausible path?

- **kula* had an ancestral MB meaning in isolation (like modern W. Walmajarri)
 - OR: a restricted type of negative modal meaning (like Jaru)
- Recall MB markers have a dual function:
 - I) Ascribe (false belief) of P, and
 - II) Assert reality: $\neg P$ is the case
- Weakening of (I) leaves only polarity function:
 - Remaining function competes with other older negators and (may) replace them (Eastern Ngumpin *kula*)
 - Or be lost entirely (e.g. Mudburra)

A plausible path?

- Before shift to SN meaning, MB meanings were being expressed in composite constructions (well-attested): *kula* MB + epistemic/evidential marker that later:
 - Remained 'constructionalised' (Jaru, (cf. Gurindji))
 - Fused into single 'particles' (Western Ngumpin + Yapa)

A final wrinkle: Warlmanpa *kulanganta*

- *kulanganta* 'DEONTIC CORRECTION'... indicates that an event “**should** have occurred (but it didn't), based on evidence gained after the situation”

Warlmanpa (BROWNE 2024: 333)

(15) **Ngayu**=ma=rna pa-na-ngu kakarra, **kulanganta**=rna pa-nkarla-rra kurlarra-purta
MB=1SG.S=2SG.O go-PST east **CORRECT**=1SG.S go-SUBJ-IMPF south-WARDS
'I went east, not south like I should have.'

- Shares with MB: Asserts: $\neg P$ is the case
- Differs from MB: No assertion of prior belief in marked proposition **but** is now (at speech time) part of a positive deontic(?) assessment in the proposition
- Further evidence that the corrective flavor is subject to change diachronically

Conclusion

- Within a closely related subgroup, MB markers show a complex historical development, distinct from:
 - Similatives
 - Reported thought constructions
- A close but complex relationship with the marking of **negation**, epistemic **modals**, other **proposition-modifying** elements
- A variety of developmental outcomes
- NGY languages (like many PN languages) have quite rich repertoires of proposition-modifying particles that are under-described
